We would like to correct the following minor errors in the paper:

- Figure 3 legend: Blue data points should be ss sims, red data points should be tt sims, blue line should be ss elliptical, and red line should be tt elliptical.
- Figure 3 caption, lines 4 and 5 should read, “...for the side-to-side configuration (blue) and the tip-to-tip configuration (red).”
- p 14965, column 2, paragraph 2, lines 8–10 should read, “...has a higher energy compared to the $1/r_{12}^2$ power law, whereas the tip-to-tip configuration has a lower energy...”

The above corrections do not change any of the conclusions of the paper.
